Cybersecurity - What an OD Needs to Know
David Kay, Senior Account Manager at
Compliancy Group

IT security has been a top priority for as long as we have had computers, but the methods for securing digital assets have changed as the use of technology has evolved to drive businesses' value, not simply support practice operations. Cloud and mobile solutions have extended organizations'

boundaries well past what were once secure perimeters. As a result, systems and data have never been more valuable or at risk of attack. What's more, the threats are changing daily, making the evaluation and purchase of IT security solutions a complicated and challenging endeavor.

2:45 - 3:45 PM

The Medical Record: Not Just a Scratch Pad for Your Notes

Joseph Ricci, Esq.

An examination of the legal requirements for a medical record, how to keep a proper record, the ways in which a medical record can be used against a provider, and the rights of patients to access their record or obtain copies.

Registration is for the full day. Partial-day registrations are not available.
