

2008 Resolution A-1
Care of Diabetic Patients

WHEREAS, it is important that diabetic patients receive regular attention to their eye health needs, and

WHEREAS, delay in scheduling visits can be a barrier to receiving this needed care, and

WHEREAS, it is the goal of optometrists to ensure these patients receive this needed care, now, therefore, be it

RESOLVED that the Pennsylvania Optometric Association develop and implement a statewide program to ensure the provision of timely optometric care to diabetic patients and to communicate findings to the other members of the diabetic patient's health care team.
