SCHEDULE

7:00 - 8:00 AM

Registration

8:00 - 9:40 AM

2 hours

Beauty And The Beast

Leslie O'Dell, O.D.

This course will cover cosmetics and their known and potential risks to the ocular surface. Ingredients will be evaluated and their potential risk to the ocular surface.

What's Next With Demodex

This course will review the current research and understanding of demodex blepharitis and provide a how to guide for treatment.

9:40 - 10:00 AM

Break

10:00 - 11:40 AM

2 hours

There Is More To Driving Than 20/20

Paul Freeman, O.D.

Driving is integrally related to daily functioning. Losing one's driver's license, independent of age, can have negative consequences, from a feeling of isolation and dependency, to depression and, as we age, decreased access to health care. This course will review some of the visual and non-visual components of driving, especially as they relate to the physiological and processing changes of the aging and the head injured populations.

11:40 AM - 12:40 PM

Lunch

12:45 - 2:25 PM

2 hours

Vision Rehabilitation after Concussion and Brain Injury

Cathy Stern, O.D.

More patients with a history of concussion or brain injury are making their way into our offices. Vision problems are very common after brain insult and research supports the effectiveness of vision rehabilitation treatment. In order to offer patients the newest, most effective treatment, you will learn some of the latest tests and neuro-visual therapy for identifying and treating the visual conditions associated with concussion and brain injury.

2:30 - 4:10 PM

2 hours

Evaluating and Prescribing for Children with Challenges

Cathy Stern, O.D.

Children with challenges need us to consider how they use vision for action and understanding in their daily activities. Vision evaluation is often neglected because of physical or cognitive limitations and the emphasis on medical management. Testing for how the child uses cognitive vision, not just how the eyes see, is important for the child and provides relevant information for school personnel, therapists, friends and family. This course will prepare you to better test, diagnose, and treat children with challenges in order to maximize their lifetime success.
